

TWO OF US

**I see the future, oh what glorious times
Two of us working side by side
I see the future, oh what glorious years
Building the kingdom, me and my bride**

**The field is white and ready to harvest
We thrust in our cycle with all our might
Two of us seeking the Holy Spirit
Two of us seeking spiritual sight**

**We consecrate time, talent and means
We seek to build the kingdom
Two of us sacrificing our all
Two of us enjoying celestial freedom**

**We work to leave this world bone tired
Our physical bodies well spent
Two of us hope for resurrection
Two knowing what the atonement meant**

**We'll walk together to the holy throne
Perhaps we'll receive a Father's kiss
Two of us kneeling before the Lord
Two embarking on eternal bliss**

**I see the future, oh what glorious times
I see the future, oh what glorious years
I see two of us serving side by side
A vision that alleviates all my fears**

**I see the future even though it is only today
The future helps me figure out a way
For when daily trials exact their pay
It is the future that helps get me through the day**
